

TECHNICAL SPECIFICATIONS

Length	3000 mm
Width	3000 mm
Height	1000 mm
Weight	30 kg
Capacity	9000 litre

The Lamor Collapsible Tank (LCT) is designed for the temporary storage of recovered oil. The LCT is simple to install and can be folded into a compact size for transportation and storage. The LCT is made from polyester reinforced 900 gr/m² oil resistant PVC fabric comprising a sturdy steel frame and comes in capacities from 5m³-25m³.

The uncomplicated design of the LCT lends it to easy and quick assembly in most situations. The LCT provides a large, instant temporary storage facility for recovered oil on site that can be pumped onwards using one of the family of Lamor pumps. Multiple tanks can be linked together therefore forming a cascade system that allows excessive water to be drained off.
